

PERFECT SURFACE, NW

Preparations To Be Done Prior To Resurfacing: COUNTERTOPS

Please inform us if any of the above resurfacing jobs have been resurfaced before. We need to allow more time for sand stripping the old finish prior to resurfacing again.

A \$30.00 charge for units with tenants residing or if ANY furnishings are in the unit scheduled for resurfacing.

The most important thing you can do prior to the arrival of our technician is to make sure the surfaces to be resurfaced are as clean as possible. A **\$30.00 cleaning fee** may be applied, or our technician may refuse to do the scheduled job if the surface(s) are too dirty.

- Give a good cleaning – best to use soap film remover and Scotch-Brite pad. Leaky fixtures **MUST** be fixed prior to the arrival of our technician.
- Remove anything you will need for the day from cabinets or drawers. We will be masking with paper and tape.
- Move or cover furnishings, paintings, rugs, or anything valuable outside the kitchen/bathroom area as far as possible from the resurfacing area. It is difficult to contain all the overspray from drifting outside the work area.
- Remove **ALL** items from the countertops, walls, floors, etc. from the kitchen/bathroom area. They may be taken out of the area, or placed in cabinets or drawers.

TILED SURFACES – Tiles must not be loose or having missing grout. Resurfacing paints a durable coating over the existing surface, but does not fill in missing grout or secure loose tiles.

Job(s) will be canceled if a flea or cockroach infestation is occurring in the unit or home scheduled for resurfacing. We will reschedule after the infestation has been resolved.

If you have any questions regarding these policies, please feel free to call our office at 503-968-6162.

Thank you for choosing Perfect Surface NW!
