

PERFECT SURFACE, NW

IMPORTANT THINGS TO KNOW WHEN SCHEDULING TUB RESURFACING

The following questions will be asked prior to resurfacing a scheduled tub or tub and surround with Perfect Surface NW. If you would like, use this checklist each time you walk the unit to make sure that when a resurfacing job is scheduled, the proper time is allowed for the work to be completed successfully.

Complex Name: _____ Unit #: _____

Has this tub and/or surround been resurfaced before? YES NO

(If the tub/surround is peeling, it has been resurfaced before. The previous paint will need to be stripped off so we can start resurfacing from the original finish. This will require additional time and an additional stripping charge will be applied.)

Is the unit occupied? (Pets must be removed.) YES NO

Is your tub a one-piece tub and surround unit? YES NO

Is your tub porcelain with a separate surround? YES NO

Is your tub fiberglass with a separate surround? YES NO

Is there any repair work to be done prior to resurfacing? YES NO
(i.e. cracks, holes, chips. If so this will be a 2-3 day process.)

Is your tub/sink faucet leaking or dripping? YES NO

Are shower doors and tracks removed? YES NO
(\$50.00 charge for removal of doors and hardware.)

Are heat, electricity, and running water in the unit? YES NO
(These are necessary for completing work.)

Has all silicone caulking been removed? YES NO

Would you like non-slip surface applied to your tub/shower floor? YES NO
(\$30.00 additional charge. Highly recommended to preserve warranty and to eliminate the need for a rubber mat) *see care sheet
